

Traffic –
TotalEnergies Golden Rule No. 2

Commitment No.6

**I adapt my driving
in challenging
conditions**

#SafeDriver

TotalEnergies

Fast facts

1 in 12 severe accidents is caused by a failure to adjust to driving conditions.

Internal TotalEnergies data

A pedestrian struck at a speed of 30 km/h has 10% risk of dying, compared with 80% at a speed of 50 km/h.

Source: United Nations Economic Commission for Europe (UNECE)

Best practices

Exercise greater caution under high-risk or hazardous conditions:

- Poor road surface condition (potholes, bumpy or buckled roadway, etc.),
- Heavy traffic and/or nearby activity (outdoor market, road work, school, pedestrians),

- Poor visibility (night, fog, heavy rain, snow, glare, etc.).

Notify your employer about road conditions,

so that the information can be shared with other drivers.

Commitments

When driving in hazardous conditions:

Slow down and drive below the speed limit in bad weather:
 > 20 km/h less outside cities
 > 10 km/h less in cities

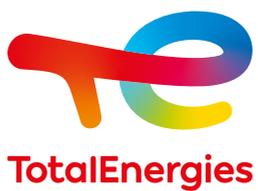

Increase the safe distance between you and the vehicle ahead of you.

Take more frequent breaks.

Take a break at least once every two hours of continuous driving.

In places where TotalEnergies prohibits night driving, vehicles must be parked in a safe place before 8 p.m. and may not get back on the road before 5 a.m. at the earliest.
