

**ELF : over 50 years
of performance and
passion.**

*Born on the track, designed for the road,
committed to you.*

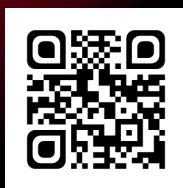

For more than fifty years, ELF has built its legend around a strong and unique identity, driven by three core values: Passion, Expertise, Performance.

Thanks to its technical innovations based on cutting-edge research, the brand has made a name for itself in the world of motorsports, pushing the limits of performance and reliability to achieve numerous victories and titles.

With unique expertise gained through privileged partnerships with the most renowned manufacturers, ELF has developed advanced maintenance solutions for all mechanical components according to vehicle type and use.

Whether you're looking for the adrenaline rush of the track, the call of the open road, or simply reliable everyday mobility, ELF supports you with a range of motorcycle lubricants and maintenance fluids that combine technical expertise, mastery, and high standards.

RIDER

RELIABILITY AS THE BEST PATH FORWARD

Designed for everyday commutes, the RIDER range brings reliability and smoothness to urban driving. It meets the demands of frequent starts, stops, and repeated gear changes by limiting wear and tear and providing long-lasting protection for the engine. With the RIDER range, every day becomes a smooth and serene driving experience.

THE MECHANICAL CHALLENGES OF URBAN USE

- Engine fouling, deposits, and sludge
- Excessive and premature clutch wear
- Wear and breakage of gear teeth

=> This can lead to additional maintenance costs, breakdowns, and mechanical failures that affect the lifespan of your motorcycle.

CLEANLINESS

Results of the Piston Merit test conducted at the TCAP research center for MOTO 4 RIDER 15W-50. Test conducted with E10 fuel (compared to a standard JASO MA2 lubricant with the same viscosity).

BENEFITS OF THE RIDER RANGE

Responsiveness and flexibility over time : Friction control ensures smooth gear changes while providing lasting protection for the clutch, even in intensive urban use.

Clean engine, preserved performance : The cleaning effect limits the formation of deposits and sludge, preventing loss of compression and power for optimal reliability on a daily basis.

Fuel compatibility, total peace of mind : Our formulations are compatible with all fuels, including biofuels, for simple and unrestricted use.
