TOTAL QUARTZ EV-AMT

APPLICATIONS

TOTAL QUARTZ EV-AMT includes a new generation of technology responding to the needs of automated manual transmission with electric engines.

BENEFITS

Maintains **excellent compatibility** with copper coils and polymer materials used in electric engines.

Provides **optimal temperature control** for the e-engines.

Especially formulated for **electric application to protect against shortcuts and static electricity**.

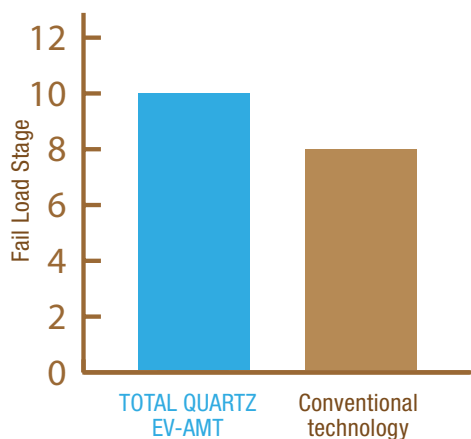

Beside those new requirements it still ensures **excellent gear shifting comfort and components durability**.

TECHNICAL PERFORMANCES

Gear durability:
FZG A10/16,6R/90

Material compatibility:
Copper wire resistance (diameter loss vs time)
