Subject: Deployment of company rule CR-GR-HSE-422	

Dear all,

The Company Rule CR-GR-HSE-422 HSE Requirements for Safety of Maritime and Inland Waterway Terminals has been published on REFLEX on the 30<sup>th</sup> of September 2020 and will entered into force on the 31<sup>st</sup> of December 2020. This rule defines the minimum HSE requirements for the management of risks associated with the loading, unloading and bunkering of vessels and barges with dangerous liquid bulk cargoes at maritime or inland waterway terminals.

A summary listing the main requirements is available on the first page of the Company Rule. To help you deploy this rule on the field, we offer in addition:

- A support file intended to list the requirements of this rule and enabling their compliance follow-up.
- A synthetic gap analysis (additions, modifications and deletions) between the old and the new rule, specific for M&S;

This new Company Rule brings some clarifications and evolutions compared to the old MS Rule CR-MS-HSEQ-640 « Maritime and inland waterway terminal safety »:

- Electrical Isolation of Connection Elements Between the vessel or Barge and the Terminal
- Frequency of pressure test
- Training of Personnel
- HSE Self-assessment

☞ I remind you that each affiliate must:

- **Identify the gaps between its referential and the new requirements,**
- **Implement the associated action plans to correct the differences,**
- **Comply with the rule on the target date.**

Hans-Christian Gützkow
