

## DID YOU KNOW ?

TotalEnergies is a multi-energy company, so we can also support you in the local production of electricity on site (solarization of your available space), or in equipping your parking lots with electric vehicle charging infrastructures.

### TotalEnergies Aviation, over 60 years of expertise

With nearly 280 airlines supplied at more than 300 airports and 500 airfields worldwide, TotalEnergies is one of the leaders in aviation fuel in France, Europe and Africa.

For over 60 years, the company has been offering a complete range of products (SAF - Sustainable Aviation Fuel- , Jet A-1, Avgas) and services adapted to the needs of each of its customers: business and leisure aviation, the aeronautical industry, airports, airlines...

## Who are we ?

### TotalEnergies, a multi-energy company

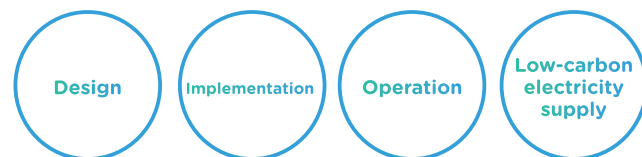

TotalEnergies is a multi-energy company committed to providing energy that is ever more affordable, clean, reliable and accessible to as many people as possible. We develop renewable and low-carbon energies and support our customers in their energy transition.

### Aviation and electricity?

Light electric aircraft is booming:

- Reducing CO<sub>2</sub> emissions
- 5 times less noise pollution compared with combustion engines
- Reduced engine maintenance...

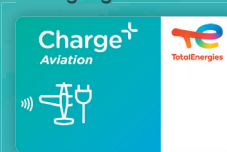

These assets contribute to its development and fits the airport environment. Take advantage of TotalEnergies expertise and our network of refueling stations.

## A turnkey solution

TotalEnergies Aviation offers a turnkey solution to equip your field with charging stations:

- Installation, supervision and maintenance of equipment 24/7
- Low carbon electricity supply
- 44kWh charging stations, equipped with CCS2 and GBT plugs
- Design of the station
- Set up the payment and invoicing
- Charge + Aviation card specific to electric charging

## What are the benefits for you?

By equipping your field with an electric charging station, you:

Help reduce CO<sub>2</sub> emissions

Reduce noise pollution up to 5 times compared to a conventional aircraft.

## OUR AMBITION?

Develop an electric charging network that promotes the expansion of light electric aviation by increasing navigability.

Our charging stations are compatible with the Velis Electro by Pipistrel, the only certified electric aircraft in the world, and will also be compatible with any future aircraft equipped with a CCS plug.

Join a growing network of charging points, giving you the opportunity to increase traffic on your site, diversify your business and customer base.

And, above all, you'll be playing your part in the development of electric aviation alongside all the pioneering players in this field!
