Solar solutions, bursting with energy!

TotalEnergies

Access to energy program at TotalEnergies

Providing reliable and affordable solar solutions

TotalEnergies is active in more than 130 countries. The company puts sustainable development in all its dimensions at the heart of its projects and operations to contribute to the well-being of people.

Because energy is vital and drives progress, it must be available to everyone. However, this access is still a daily challenge for 733 million* people who live without access to electricity. In this context, **our teams are committed to provide energy that is ever more affordable, clean, reliable and accessible to as many people as possible.**

In 2010, TotalEnergies launched the access to energy program and since 2018 we provide our own range of Sunshine solar solutions, in station or through partners..

Our objective:

25 million people impacted by 2025
