Subject: Deployment of company rule CR-GR-HSE-418	

Dear all,

The Company Rule CR-GR-HSE-418 *HSE Requirements for Site Traffic* has been published on REFLEX on the 2<sup>nd</sup> of October 2020 and will enter into force on the 2<sup>nd</sup> of July 2021. This rule defines the minimum HSE requirements to be complied with for the management of risks related to site traffic for vehicles, motorised machines, and pedestrians inside sites operated by MS entities or affiliates, existing or as a project, including buildings, parking lots and work sites. Guides and manuals GM-GR-HSE-452 and GM-GR-HSE-460 respectively provide additional information to this rule related to good practices for preventing traffic accidents (including the completion of the risk analysis/traffic plan) and good practices for using forklifts.

A summary listing the main requirements is available on the first page of the Company Rule. To help you deploy this rule on the field, we offer in addition:

- A support file intended to list the requirements of this rule and enabling their compliance follow-up.
- A synthetic gap analysis (additions, modifications and deletions) between the old and the new rule, specific for M&S;

This new Company Rule brings some clarifications and evolutions compared to the old MS Rule CR-MS-HSEQ-201 « General safety rules » and more particularly to paragraphs 5 and 7:

- Risk Identification and Traffic Plan.
- Authorisation for Driving and Maintenance of Vehicles and Motorised Machines On Site.
- Roadway Maintenance.

**☛ I remind you that each affiliate must:**

- **Identify the gaps between its referential and the new requirements,**
- **Implement the associated action plans to correct the differences,**
- **Comply with the rule on the target date.**

Hans-Christian Gützkow
