

MARTOL LVG 25 AQ

VOC-free vanishing oil for foil metal forming with thermal degreasing

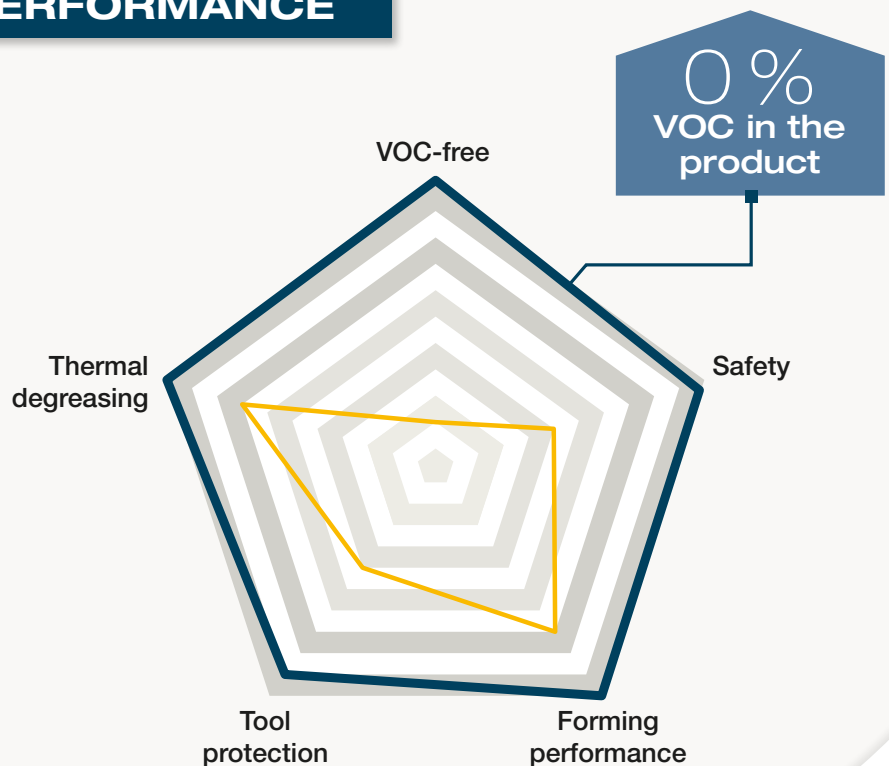

MARTOL LVG 25 AQ (Air Quality)

is a high performance VOC*-free vanishing oil for all types of metal forming, specially designed for processes including thermal degreasing, such as brazing assembly.

* Volatile organic compounds

TECHNICAL PERFORMANCE

CUSTOMER BENEFITS

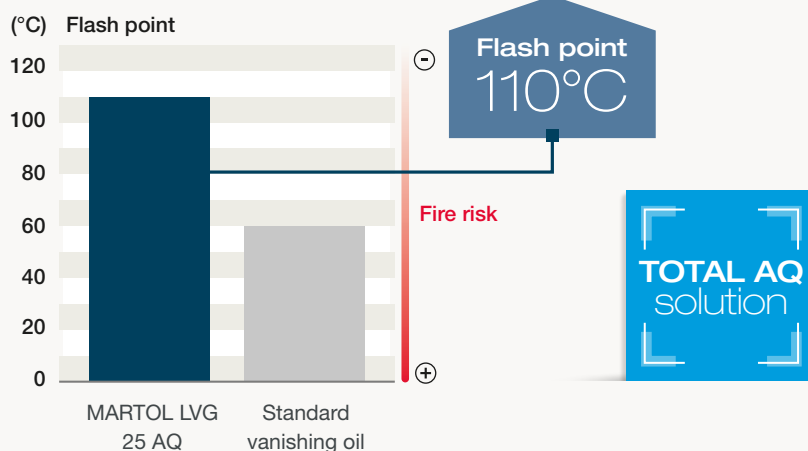

- > Limited fire risk
- > Thermally degreasable
- > Increased tool life

◆ MARTOL LVG 25 AQ
◆ Standard vanishing oil

TOTAL

AIR QUALITY AND WORKSHOP SAFETY

✓ STANDARDS AND SPECIFICATIONS

- ISO TS 12927 MHB
- VOC-free following European directive 1999/13/CE

> **MARTOL LVG 25 AQ** does not contain any VOCs, yet it still offers a fast rate of evaporation, therefore reducing degreasing operations. At the same time, its high flash point limits fire risks.

THERMALLY DEGREASABLE

> **Staining test: 1 hour at 300°C**

No staining and no residue, even at high temperatures.

A SUSTAINABLE FORMULA

> TOTAL chooses all the components in its products carefully. All of the solvents used in **Martol LVG 25 AQ** are biodegradable in compliance with OECD 306, and all additives are vegetable-based.

MARTOL LVG TECHNOLOGY:

MARTOL LVG products are well known in the metalworking industry for their outstanding technology. Unlike ordinary vanishing products, base oil and additives both evaporate at high temperature, leaving the metal sheet perfectly clean and dry for post-treatments. The solution was specifically developed for brazing operations.

www.lubricants.total.com/pro/industry.html

“**MARTOL LVG 25 AQ** is designed to meet both technical and HSEQ requirements for stamping processes. Leveraging its 30 years experience in the brazing industry, TOTAL offers an evolution that ensures air quality for workers while reducing petroleum emissions in the environment.”

David, Total Product Manager
