

We are #SafeDrivers

On the road, we are all responsible

Road accidents are one of the leading causes of serious accidents at the Company. It is crucial to remain vigilant behind the wheel.

For many years, our initiatives to reduce road accidents have far exceeded local regulations. Our rules and standards are among the most demanding. They apply to everyone: both TotalEnergies employees and contractors.

Nothing can replace prevention.

**We have a role to play
in making roads safer.**

Did You Know?

Between 2016 and 2022, the number of serious accidents involving our own and contractor drivers declined by a factor of **3**.

This proves that our road-safety initiatives have an impact. Let's keep it up!

2022: Road statistics at TotalEnergies

**600
million**

km traveled
by our employees
and contractors

**1.4
million**

people transported
(road transportation)

**80
million**

tons of products
transported by road

10,000

trucks dedicated
to our operations

12,000

passenger cars
used by the Company

TotalEnergies internal data

Actions and commitments

As a major player in mobility worldwide, TotalEnergies is a:

- **Signatory to a national call to action by French businesses** to promote road safety.
- **Member of the Global Road Safety Partnership** to prevent road accidents.
- **Founding member of the United Nations Road Safety Fund.**

The Company has also signed onto the Decade of Action for Road Safety, which has set the ambitious target of preventing at least 50% of road traffic deaths and injuries by 2030.

66%

of our road accidents are caused by risky driving behavior.

These include inappropriate speed, non-compliance with safety distances, fatigue and phoning while driving.

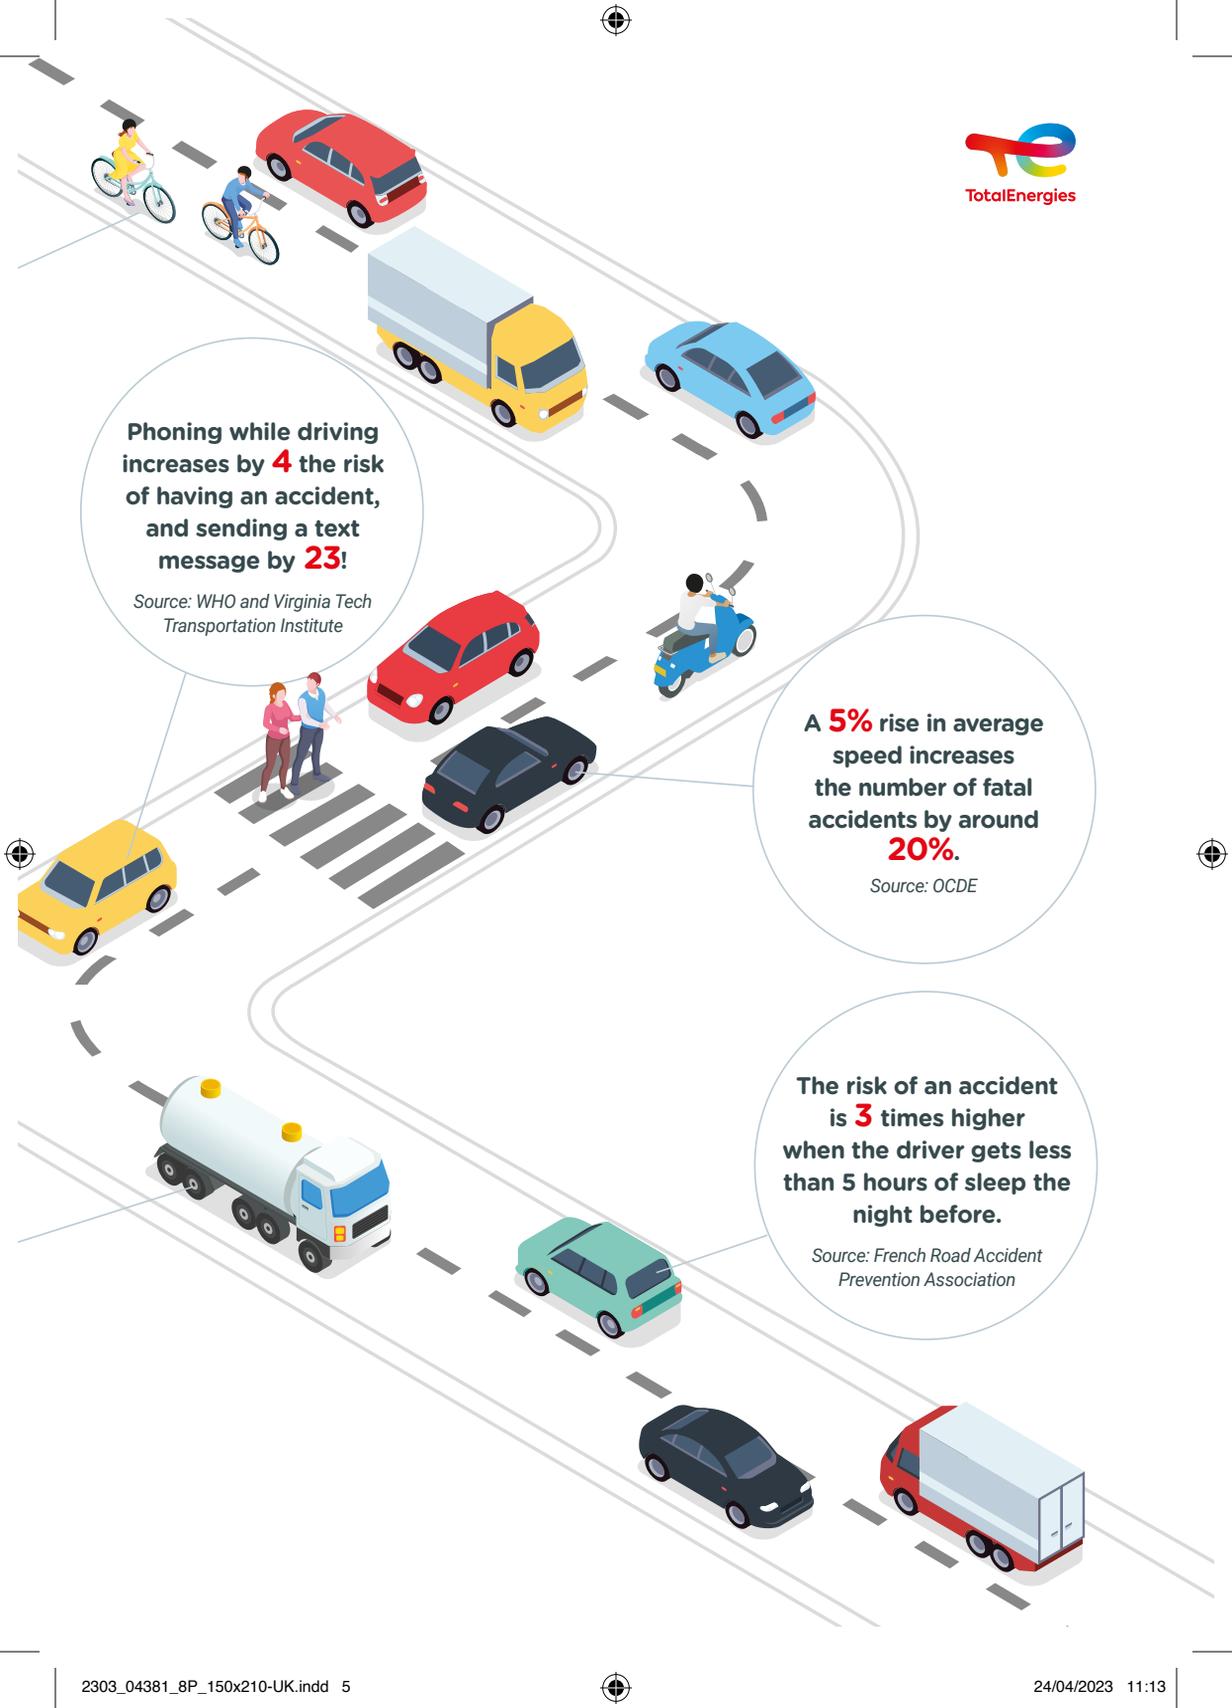

Driver behavior is the leading cause of road accidents, far ahead of external causes such as other drivers, weather and infrastructure (25%) and mechanical problems (5%).

50%
of the fatalities
in road accidents
are pedestrians,
cyclists or users
of motorized
two-wheelers.

**Drowsiness
at the wheel accounts
for 20% of fatal
road accidents.**

Source: French National Institute
for Sleep and Vigilance

Phoning while driving increases by **4** the risk of having an accident, and sending a text message by **23**!

Source: WHO and Virginia Tech Transportation Institute

A **5%** rise in average speed increases the number of fatal accidents by around **20%**.

Source: OCDE

The risk of an accident is **3** times higher when the driver gets less than 5 hours of sleep the night before.

We are #SafeDrivers

In 2017, we launched a program to raise road safety awareness among employees of the Company and our contractors. Better known as #SafeDriver, this program promotes our individual and collective commitment to safer roads, shares the Company's best practices and guidelines and reports on our progress. It's important to keep up our efforts! The 2023-2024 campaign focuses on three priority driving behaviors.

I keep control of my vehicle at all times

3 out of 10 serious accidents are caused by a **failure to adapt to the driving situation**

Staying in full control of your vehicle means being able to avoid an obstacle or maintain your trajectory no matter what the situation, configuration or traffic conditions.

I don't drive if I'm tired and I don't allow distractions

2 out of 10 serious accidents are caused by driver fatigue or distraction

Knowing how to drive means knowing when to take breaks. It also means refraining from all other activities when driving.

Never phone or text while driving!

I pay attention to other road users and pedestrians when I'm driving

2 out of 10 serious accidents are caused by other road users' behavior

To prevent hazards, a few simple rules apply: Anticipate other drivers' errors, maintain a good safety distance, keep a close eye out for pedestrians, cyclists and two-wheelers, etc.
