

Multifunction Fluid

Unjams locks, controls, springs, slides, cables and fasteners.

Description

TotalEnergies multifunction fluid lubricates systems made out of metal and small mechanisms, prevents squeaking joints, pedals and gears and protects against the corrosion by leaving a protective film. It removes moisture from metal surfaces and electrical contacts. It dissolves rubber and tar deposits.

Properties

LUBRICANT

- Lubricates mechanical parts thanks to its good penetration power
- Avoids squeaks

PENETRATING OIL/GREASE

- Resolves numerous lubrication and jamming problems for a wide range of equipment and machine parts (locks, hinges, bolts, pipes, zippers, etc.)

ANTI-CORROSION

- Application of the product on surfaces removes existing water. It thus effectively protects metal pieces from corrosion
- Leaves a slight oil film that protects against oxidation

ANTI-MOISTURE

- Locks out moisture and forms a protective barrier layer
- Eliminates build-up of dust and dirt on mechanical equipment

Usages

- Specially developed to quickly and effectively penetrate equipment assemblies that have been immobilized due to oxidation.
- Unjams, cleans, lubricates, protects and eliminates moisture.
- Household use: electrical and mechanical equipment, sewing machines, hinges, locks, etc.
- Garden/Leisure: hunting and fishing gear, ski bindings, lawnmowers, chainsaws, shears, bicycles, etc.
- Automotive: ignition circuits, antennas, doors, windshield wipers, ignition coils, etc.
- Ideal for repair and maintenance services, civil engineering, and industrial applications (engineering, agriculture)

Instructions of use

- Read scrupulously the informations on the can.
- Product classified extremely inflammable / pressurized container.
- Perishable product. Shelf life: 3 years

Composition

- Active ingredients: hydrocarbonate solvents with -5% aromatics. Specific mineral oil-based fluid. Corrosion inhibitor/water repellent.
- Propellant: Butane (flammable)
