Subject: REACH KKDIK – INFORMATION LETTER

Dear customer,

Applicable to customers buying PE, PP, PS or EPS produced by TotalEnergies in Europe and importing these products into Turkey.

According to Kimyasalların Kaydı, Değerlendirilmesi, İzni ve Kısıtlanması Hakkında Yönetmelik, No: 30105 ("KKDIK Regulation"), which came into force on December 23, 2017, substances, on their own or in mixtures, imported into Turkey in quantities of 1 ton or more per year, have to be preregistered before October 31, 2025. On March 4, 2026, Turkey's Ministry of Environment and Urbanisation announced that by September 30 2026, all KKDIK registrants must obtain at least a provisional registration number for every substance within the scope of KKDIK, regardless of tonnage band or hazard classification.

TotalEnergies assessed the composition of the above-mentioned polymers which are imported into Turkey and identified the list of substances which fall under KKDIK registration obligation. Consequently, TotalEnergies pre-registered some substances and monomers through an Only Representative.

Furthermore, TotalEnergies has contacted the suppliers of pre-registered substances in order to inform them about the KKDIK regulation and requesting them to obtain a registration number for their substances before September 30, 2026 and to file a full registration dossier within the applicable deadlines of 31 December 2026, 2028, or 2030.

If your company purchases the above-mentioned polymers directly from TotalEnergies and imports them into Turkey, you will benefit from these registrations as downstream user under KKDIK. However, indirect imports of TotalEnergies polymers cannot be covered and consequently, they will require separate registrations.

Sincerely,

DocuSigned by:
