

Engine Cleaner

Handles cleaning and degreasing problems.

Description

Easy to apply thanks to its spray nozzle, Engine Cleaner perfectly cleans external engine components and other mechanical parts.

Its powerful active foam removes grease deep down, even in the hardest-to-reach areas. It removes oil and sludge while preserving seals, rubber and hoses.

Properties

- Handles cleaning and degreasing problems.
- Dissolves and emulsifies grease, sludge, paraffin, mud, etc.
- Good for external cleaning of engines, agricultural equipment, machine parts and heavily soiled floors.
- Deep cleans and degreases.
- Emulsifiable, can be rinsed with water, eliminating the need for a solvent collector
- Also serves as a powerful detarring agent.
- Ideal for mechanics, construction companies, cleaning and repair companies, etc...

Instructions for use

- Spray on cool, heavily soiled surfaces.
- Let sit for several minutes.
- Scrub if necessary and rinse with large quantities of water after protecting electrical systems.
- Repeat process if necessary.

Composition

- Active ingredients: Specific hydrocarbon-based solvents and non-ionic surfactants.
- Flash point higher than 55°C (non-flammable).
- Aromatic and chlorine solvent-free.
- Emulsifiable in water.
- Propellant: Butane (Extremely flammable)
