FLUOSTAR® 2 L

High Quality Fluorinated Grease

High quality fluorinated grease for the lubrication of **corrugator**, **pre-heater** and **pressure rolls bearings**

FLUOSTAR® represent a range of high quality greases based on specific perfluorinated oils. FLUOSTAR® greases are recommended when the other lubricants, mineral or synthetic, cannot meet the most requested specifications:

- Exceptional high-temperature stability
- Excellent chemical inertness (gas and aggressive liquids)
- Non-flammable
- Full compatibility with all plastics and elastomers
- Very long life time
- Very low friction
- Good viscosity-temperature behavior
- Very low vapor tension
- Good resistance to nuclear radiations
- Non toxic

Benefits

- Full efficient lubricant
- Very long lasting lubrication
- Very competitive price

FLUOSTAR® 2 L grease is used all around the world for the lubrication of corrugated rolls bearings in cardboard industry. The high performances of FLUOSTAR® 2 L are improved to meet perfectly all the constraints of this application. The quality of FLUOSTAR® 2 L is approved by different OEM who added this product on their lubrication table.

1

CORRUGATED AND PRE-HEATER ROLL BEARINGS LUBRICATION

FLUOSTAR® 2 L is fully suitable for the long lasting lubrication of the double row spherical roller bearings exposed to high temperature and steam atmosphere.

2

LUBRICATION OF THE CORRUGATED ROLLERS

LUBRILOG L A 15 and/or LUBRILOG L A 68 are white oils, NSF H 1 approved lubricants, for the cleaning and lubrication of the flutings.

3

DISC CUT SYSTEM LUBRICATION

LUBRILOG L A 68 are white oils, NSF H 1 approved lubricants, for the rotary disc cutter lubrication in cardboard industry.

LUBRILOG already supply many customers on BHS, AGNATI, MITSUBISHI, PETERS, SIMON, etc... materials, such as : INTERNATIONAL PAPER, DS SMITH, MONDI, EMIN LEYDIER, ONDULYS, CGW, SEYFERT
