

# SAFETY DATA SHEET DISTILLATE MARINE FUEL (DML)

**SDS #**: 30239

## **Section 1. Identification**

Product identifier : DISTILLATE MARINE FUEL (DML)

## Relevant identified uses of the substance or mixture and uses advised against

#### **Identified uses**

Fuel for diesel engines: vessel, boat Distribution of substance - Industrial

Formulation & (re)packing of substances and mixtures - Industrial

Use as a fuel - Industrial
Use as a fuel - Professional
Use as a fuel - Consumer

#### Supplier's details

TotalEnergies Marine Fuels Pte Ltd 182 Cecil Street

#27-01 Frasers Tower Singapore 069547 Tel: +65 6849 5266

ms.ap-sds@totalenergies.com

TotalEnergies Marketing Asia-Pacific Middle East Pte. Ltd.

182 Cecil Street #27-01 Frasers Tower Singapore 069547 Tel: +65 6879 2200

ms.ap-sds@totalenergies.com

See section 16 to have the contact details of the local supplier

Emergency telephone number (with hours of operation)

Asia-Pacific: +65 3158 1074

## Section 2. Hazards identification

Classification of the substance or mixture

: ACUTE TOXICITY (inhalation) - Category 4 SKIN CORROSION/IRRITATION - Category 2

CARCINOGENICITY - Category 2

SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2

ASPIRATION HAZARD - Category 1

AQUATIC HAZARD (LONG-TERM) - Category 2

## **GHS** label elements, including precautionary statements

Hazard pictograms

Signal word : Danger

Date of revision : 2023/12/12 Singapore ENGLISH Version :1 1/15

SDS#: 30239

**Hazard statements** 

: May be fatal if swallowed and enters airways.

Causes skin irritation. Harmful if inhaled.

Suspected of causing cancer.

May cause damage to organs through prolonged or repeated exposure. (bone

marrow, liver, thymus)

Toxic to aquatic life with long lasting effects.

### **Precautionary statements**

**Prevention** 

: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Do not breathe vapor. Wash thoroughly after handling.

Response

: Collect spillage. IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting. Take off contaminated clothing and wash it before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice or attention.

**Storage** 

: Store locked up.

**Disposal** 

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

result in classification

Other hazards which do not : The product may form flammable mixtures with air when heated above the flash point.

> In the presence of hot spots, there is a special risk of fire or explosion under certain conditions involving accidental release of vapor or leaks of product under pressure. Hazard of slipping on spilled product.

Vapor may be irritating to eyes and respiratory system.

High vapor concentrations can cause headaches, dizziness, drowsiness and nausea

and may lead to unconsciousness.

If swallowed accidentally, the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious pulmonary lesions (medical

survey during 48 hours).

## Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	% (w/w)	CAS number
Fuels, diesel	>99	68334-30-5

**Additional information** : Contains: Dye and fiscal marker

Component: % (v/v)

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Chemical formula : Not applicable.

Date of revision : 2023/12/12 **ENGLISH** Version :1 Singapore

**SDS #**: 30239

## Section 4. First aid measures

### **Description of necessary first aid measures**

**Eye contact** 

: Check for and remove any contact lenses. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. If irritation persists, get medical attention.

Inhalation

: Inhalation is unlikely because of the low vapour pressure of the substance at ambient temperature. Exposure to vapours may however occur when the substance is handled at high temperatures with poor ventilation.

Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus.

If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Seek immediate medical attention/advice.

If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Skin contact** 

: Immediately remove any contaminated clothing, shoes or socks. Wash contaminated skin with soap and water. Continue to rinse for at least 10 minutes. Get medical attention if symptoms appear. Wash clothing before reuse. Clean shoes thoroughly before reuse.

High pressure injection of the products under the skin may have very serious consequences even though no symptom or injury may be apparent. In this case, the casualty should be sent immediately to be spital.

the casualty should be sent immediately to hospital.

Ingestion

: Take victim immediately to hospital. SYMPTOMS MAY NOT APPEAR IMMEDIATELY. Wash out mouth with water. Keep person warm and at rest. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Loosen tight clothing such as a collar, tie, belt or waistband.

### Most important symptoms/effects, acute and delayed

## Potential acute health effects

**Eye contact** : No known significant effects or critical hazards.

Inhalation: Harmful if inhaled.Skin contact: Causes skin irritation.

Ingestion : May be fatal if swallowed and enters airways.

### Over-exposure signs/symptoms

Skin contact

**Eye contact** : May cause mild reversible eye irritation.

watering redness

Inhalation : In case of exposure to hot product, inhalation of vapors in high concentration may

cause irritation of respiratory system.

Can cause central nervous system (CNS) depression.

nausea or vomiting

headache
dizziness/vertigo
convulsive seizures
cardiac arrhythmia
Loss of coordination
: Causes skin irritation.

Date of revision : 2023/12/12 Singapore ENGLISH Version :1 3/13

SDS #: 30239

**Ingestion** : nausea or vomiting

stomach pains diarrhea

Can cause central nervous system (CNS) depression.

### Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician

: Aspiration hazard if swallowed. In this case, the product may enter the lungs and lead to the rapid development of very serious pulmonary lesions that may appear in the following hours. Seek immediate medical attention. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments
Protection of first-aiders

: No specific treatment.

: First aid personnel must be aware of personal risk during rescue! Put on

appropriate personal protective equipment (see Section 8).

Before attempting to rescue casualties, isolate area from all potential sources of ignition including disconnecting electrical supply. Ensure adequate ventilation and check that a safe, breathable atmosphere is present before entry into confined spaces.

CAUTION! Hazard of slipping on spilled product.

IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR

EMERGENCY MEDICAL CARE.

### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

### **Extinguishing media**

Suitable extinguishing media

: on small fires:

Use dry chemical, CO2, water spray (fog) or foam. Sand.

large fires:

Foam, Water fog (trained personnel only)

Unsuitable extinguishing media

Do not use a solid water stream as it may scatter and spread fire.

Simultaneous use of foam and water on the same surface is to be avoided as water

destroys the foam.

Specific hazards arising from the chemical

: Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.

Fire water contaminated with this material must be contained and prevented from

being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products

Decomposition products may include the following materials:

Carbon dioxide (CO<sub>2</sub>). carbon monoxide

nitrogen oxides (NO, NO2 etc.)

various hydrocarbons

Aldehyde. Soot

These maybe highly dangerous if inhaled in confined spaces or at high

concentration.

If sulphur compounds are present in appreciable amounts, combustion products

may include also H2S and SOx (sulfur oxides) or sulfuric acid

Date of revision : 2023/12/12 Singapore ENGLISH Version :1 4/15

**TotalEnergies** SDS #: 30239

**Special protective actions** for fire-fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water to cool tanks and parts exposed to the thermal flux not caught up in the

**Special protective** equipment for fire-fighters : In case of a large fire or in confined or poorly ventilated spaces, wear full fire resistant protective clothing and self-contained breathing apparatus (SCBA) with a full face-pieceoperated in positive pressure mode.

Remark

: Not considered explosive based on chemical structure and oxygen balance considerations

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Only allow access to authorised persons. Do not touch or walk through spilled material. Hazard of slipping on spilled product.

ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate

Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective

equipment.

For emergency responders

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions** 

: Toxic to aquatic life with long lasting effects. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). It may contaminate ground water.

## Methods and materials for containment and cleaning up

**Small spill** 

: Stop leak if without risk.

Move containers from spill area.

Use spark-proof tools and explosion-proof equipment.

Absorb with dry earth, sand or other non-combustible material.

Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Cover discharges with foam in order to reduce the risks of ignition.

Move containers from spill area. Approach release from upwind.

Prevent entry into sewers, water courses, basements or confined areas. Use sparkproof tools and explosion-proof equipment. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the

same hazard as the spilled product.

## Section 7. Handling and storage

### Precautions for safe handling

**Protective measures** 

: Put on appropriate personal protective equipment (see Section 8). Avoid contact with eyes, skin and clothing.

Avoid breathing vapor. Never siphon by mouth. Manipulate in a well-ventilated area. Ensure ventilation is adequate if there is a risk of aerosol formation or vapor build-up. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Date of revision : 2023/12/12 **ENGLISH** Version : 1 Singapore

**SDS #**: 30239

Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges.

Avoid release to the environment.

Advice on general occupational hygiene

: After handling, always wash hands thoroughly with soap and water. Take off immediately all contaminated clothing and wash it before reuse. Provide regular cleaning of equipment, work area and clothing. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Hazard of slipping on spilled product.

Conditions for safe storage, including any incompatibilities

: Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

OPERATE ONLY ON COLD AND DEGASSED TANKS IN VENTILATED PREMISES (TO AVOID RISK OF EXPLOSION). Never weld any container or empty pipe that has not been degassed.

Before entering storage tanks and commencing any operation in a confined area, check the atmosphere for oxygen content and flammability.

Ensure all equipment is electrically grounded before beginning transfer operations.

Design installations (machinery and equipment) to prevent burning product from spreading (tanks, retention systems, interceptors (traps) in drainage systems). Friction generated by product discharge can create static charges of sufficient magnitude to cause SPARKS WHICH MAY LEAD TO FIRE OR EXPLOSION. Storage installations should be designed with adequate bunds so as to prevent ground orwater pollution in case of leaks or spills.

Prevent leaks and prevent soil/water pollution caused by leaks. Take all necessary precautions to prevent water from entering the containers, tanks, transfer lines etc... Use only containers, seals, pipes, etc... made in a material suitable for use with aromatic hydrocarbons. Recommended materials for containers, or container linings: Mild steel, Stainless steel. High density polyethylene (HDPE). Some synthetic materials may be unsuitable for containers or container linings depending on the material specification and intended use. Compatibility should be checked with the manufacturer.

If the working temperature is higher than the flash point: Ground and bond container and receiving equipment.

## Section 8. Exposure controls/personal protection

## **Control parameters**

#### Occupational exposure limits

Ingredient name	Exposure limits
Fuels, diesel	ACGIH TLV (United States, 1/2022). [Diesel Fuel as total hydrocarbons] Absorbed through skin.
	TWA: 100 mg/m³, (measured as total hydrocarbons) 8 hours. Form: Inhalable fraction and vapor

### **Biological exposure indices**

No exposure indices known.

### **Occupational exposure limits Philippines**

Date of revision : 2023/12/12 Singapore ENGLISH Version :1 6/15

localEnergies	SDS#:	30239

Product/substance	Exposure limit values
None.	

**Advisory OEL** 

: Not applicable.

Appropriate engineering controls

: Ensure adequate ventilation and check that a safe, breathable atmosphere is present before entry into confined spaces.

Explosive atmosphere in confined spaces. Check that the vapor concentration is lower than the lower flammability limit (explosimeter, ...).

**Environmental exposure** controls

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### **Individual protection measures**

**Hygiene measures** 

: See section 7.

**Eye/face protection** 

: Goggles, face shield or other full-face protection should be worn if there is a risk of direct exposure to aerosols or splashes.

Ensure that eyewash stations and safety showers are close to the workstation location.

## Skin protection Hand protection

: Hydrocarbon-proof gloves for aromatic hydrocarbons.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.

Note: Gloves made of PVA are not water-resistant, and are not suitable for emergency use.

Repeated or prolonged exposure:

Glove material: polyvinyl alcohol (PVA); any thickness; Break through time > 480

min: standard : EN 374

Glove material: Fluorinated rubber; any thickness; Break through time > 480 min;

standard: EN 374

Glove material: Nitrile rubber; Glove thickness > 0.5 mm; Break through time > 480

min; standard: EN 374

In case of contact through splashing:

Glove material: Neoprene; Glove thickness > 0.75 mm; Break through time > 60 min;

standard: EN 374

Glove material: polyvinyl chloride (PVC); Glove thickness > 1.3 mm; Break through

time > 30 min; standard : EN 374

## **Body protection**

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing.

Antistatic non-skid safety shoes or boots

## **Respiratory protection**

: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

In case of insufficient ventilation, wear suitable respiratory equipment. When using a mask or half mask: Full face piece respirator with organic vapor/acid gas cartridge or canister, Type A. Respirator with combination filter for vapor/particulate, Type A/P2. In an emergency or for exceptional short-lasting jobs in an atmosphere polluted by the product, it is necessary to wear protective respiratory equipment. To enter tankers, tanks, reservoirs where the oxygen content is too low, wear

Date of revision : 2023/12/12 Singapore ENGLISH Version : 1 7.

**SDS#:** 30239

insulating respiratory apparatus. The use of breathing apparatus must comply strictly with the manufacturer's instructions and the regulations governing their choices and uses.

## Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature (20°C / 68°F) and pressure (1013 hPa) unless otherwise indicated

**Appearance** 

**Physical state** : Liquid. [limpid] Color : Blue.-Green. Odor : Characteristic. **Odor threshold** : Not available. : Not applicable. Melting point/freezing point : Not available.

**Boiling point** : 150 to 380°C (302 to 716°F) [ISO 3405] : Closed cup: ≥60°C (≥140°F) [ISO 2719] Flash point

**Evaporation rate** : Not applicable.

Flammability (solid, gas) : Flammable in the presence of the following materials or conditions: open flames,

sparks and static discharge.

Lower and upper explosive

: Lower: 0.5% (flammable) limits Upper: 5% Vapor pressure : Not available. Vapor pressure 37.8°C : < 1 kPa

(100°F)

Vapor density : >5 [Air = 1]

**Relative density** : <0.89 [ISO 12185]

**Density** : <0.89 g/cm3 [15°C] [ISO 12185]

Solubility(ies)

Media	Result
water	Not soluble

Miscible with water : No.

Partition coefficient: n-

octanol/water

: Not applicable.

**Auto-ignition temperature** : >250°C (>482°F) [ASTM E 659]

**Decomposition temperature** : Not available.

: Kinematic (40°C (104°F)): <7 mm²/s (<7 cSt) [ISO 3104] **Viscosity** 

Flow time (ISO 2431) : Not available.

**Particle characteristics** 

: Not applicable. Median particle size

Date of revision : 2023/12/12 **ENGLISH** Version:1 Singapore

**SDS #**: 30239

## Section 10. Stability and reactivity

Reactivity

: No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability** 

: Stable under recommended storage and handling conditions (see Section 7).

Possibility of hazardous reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid

: Avoid all possible sources of ignition (spark or flame). Take precautionary measures against static discharges.

Incompatible materials

: Reactive or incompatible with the following materials:

strong acids

Strong oxidizing agents

Strong bases Halogens

**Hazardous decomposition** 

products

: Use as a fuel.: Carbon dioxide (CO2). carbon monoxide, nitrogen oxides (NO,

NO2 etc.), various hydrocarbons, Aldehyde. Soot.

SADT : Not available.

## **Section 11. Toxicological information**

## Information on toxicological effects

#### **Acute toxicity**

Fuels, diesel	-		-		Readily

### **Bioaccumulative potential**

Not available.

#### **Mobility in soil**

Soil/water partition coefficient (Koc)
Mobility in soil

- : Not available.
- : Given its physical and chemical characteristics, the product is generally mobile in the ground. It may contaminate ground water. Volatilisation is dependent on Henry's Constant which is not applicable to UVCB. The product spreads on the surface of the water. In water, the majority of components of this product will be absorbed on sediments. The product are resistant to hydrolysis because they lack a functional group that is hydrolytically reactive.

Other adverse effects

: Not applicable.

## Section 13. Disposal considerations

## **Disposal methods**

: Hazardous waste.: Dispose of waste product or used containers according to local regulations.

The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally.

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
