

TotalEnergies

**in brief
2021**

01

Who We Are

A Broad
Energy
Company

Our Ambition

Our ambition is to be a major player in the energy transition.

TotalEnergies is a **broad energy company** committed to providing energy that is ever more **affordable, clean, reliable and accessible** to as many people as possible.

More energy, fewer emissions: that is the dual challenge we must meet with our customers, stakeholders and society as a whole to contribute to our planet's sustainable development and effectively address the issue of climate change.

We promote renewable, decarbonized energies, produce and market fuels, natural gas and electricity.

We are investing massively in solar and wind power in order to become one of the **top five producers of renewable energy by 2030**.

The Energy Journey

To preserve the planet in the face of the climate challenge, we are moving together towards new energies.

This energy journey is ours.

OIL

NATURAL
GAS

ELECTRICITY

HYDROGEN

BIOMASS

WIND

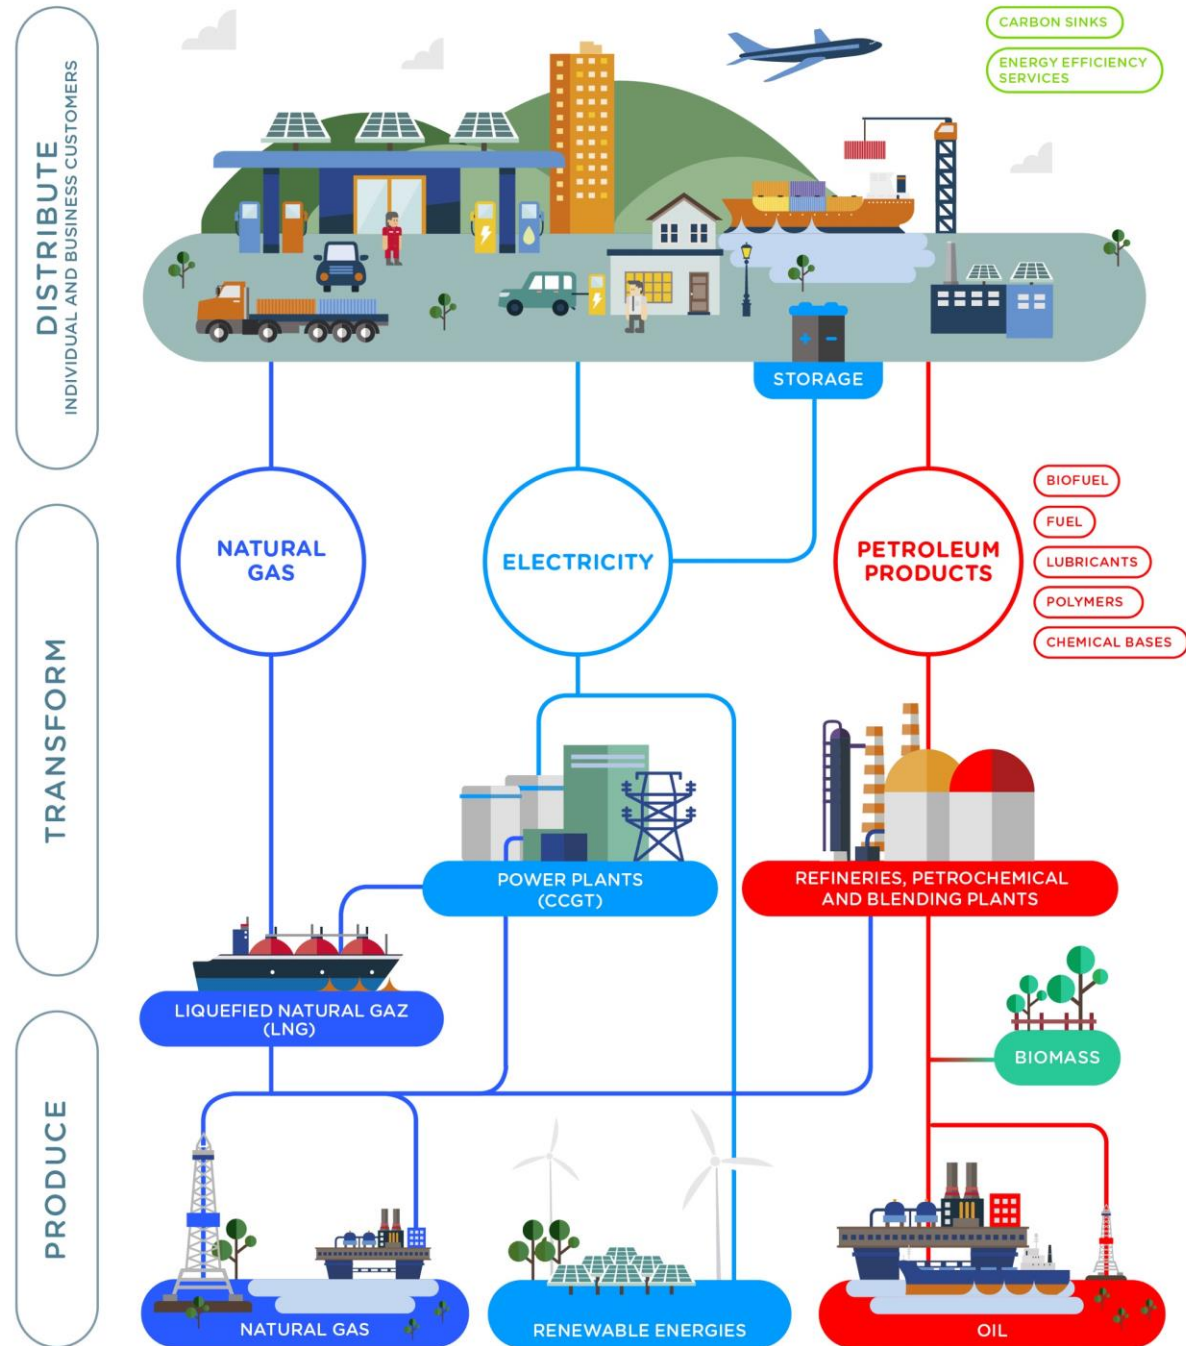

SOLAR

Overview of Our Operations

Our activities span the entire value chain:

- from the **production** of energies,
- and their **transportation** and **transformation** into intermediate or finished products,
- to their **storage** and **distribution** to meet the needs of individual and business customers.

We also **develop** carbon neutrality projects for our own sites and for customers, with solutions to enhance **energy efficiency** and to **capture** or **store carbon** (CCS and natural carbon sinks).

Our Strategy

Our strategy is to **increase our energy production while reducing greenhouse gas emissions.**

It is based on four pillars.

Focusing on natural gas, biogas and hydrogen

Expanding in liquefied natural gas (LNG) and developing renewable gas;
Promoting natural gas, an ally of the energy transition, for electricity generation, heating and travel.

Building a world leader in electricity

Increasing investment in low-carbon electricity, mainly from renewables;
Developing an integrated model for electricity, from production to sale.

Decarbonizing and saving liquid energies

Focusing on the most resilient oil projects by preferring value to volume;
Adapting our refining capacity and sales to changing demand and increasing our production of renewable fuels.

Developing carbon sinks

Continuing to invest in natural carbon sinks (forests, regenerative agriculture and wetlands) and technologies for the capture and storage of CO₂.

02

Our
Commitment

Being a Responsible Energy Company

Our Action Principles

TotalEnergies relies on a set of principles that are at the heart of its **responsible business model** and Code of Conduct.

These principles apply to all our operations worldwide.

Safety

Security, operational excellence and sustainable development go hand in hand.

Respect for Each Other

The cornerstone of our Code of Conduct.

Zero Tolerance

Our rule of conduct in the fight against corruption and fraud.

Transparency

Our rule of conduct in engagement with society, whatever the subject.

Getting to Net Zero

TotalEnergies' ambition is to **get to net zero by 2050, together with society, across its production and energy products used by its customers** (Scopes 1+2+3).

To do that, we have set **three main axes.**

Get to net zero for worldwide operated activities by 2050 or sooner (Scopes 1+2);

Get to net zero worldwide for all indirect emissions related to the use by our customers of energy products sold for end use by 2050 or sooner (Scope 3);

Get to net zero in Europe, from production to the use by our customers of energy products sold for end use by 2050 or sooner (Scopes 1+2+3).

Getting to Net Zero

TotalEnergies' ambition is to **get to net zero by 2050, together with society, across its production and energy products used by its customers** (Scopes 1+2+3).

To fulfill our ambition, we act on **four areas**.

Acting on emissions: decreasing our greenhouse gas emissions.

Acting on products: reducing the average carbon footprint of our energy product mix.

Acting on demand: supporting customers through the energy transition.

Developing carbon sinks: investing in natural sinks and in carbon capture and storage.

Meeting the Challenges of Sustainable Development

TotalEnergies integrates **sustainable development** in all its dimensions in its **strategy and projects** to contribute to the well-being of people around the world.

We want to be a reference with regard to the **United Nations' Sustainable Development Goals**. This has led us to focus on **four key areas**.

Sustainable energy

Transforming the energy model to fight climate change and meet people's needs.

Well-being

Setting the benchmark as an employer and responsible operator.

Environmental excellence

Being exemplary in our environmental management and use of the planet's natural resources.

Value creation for society

Generating shared prosperity across regions.

TotalEnergies
FOUNDATION

Our Company, engaged with our host communities, and youth in particular, acts through its **global citizenship program**: TotalEnergies Foundation.

TotalEnergies Foundation's actions are structured around **four axes**:

> **Youth Inclusion and Education**

> **Climate, Coastal Areas and Oceans**

> **Road Safety**

> **Cultural Dialogue and Heritage**

Through the **Action! program**, each employee has a chance to volunteer in the community for up to three days of work time a year.

03

Our Assets

To Reinvent
Energy

Our Values

They **guide our actions and relations** with our stakeholders.

SAFETY

**RESPECT
FOR EACH OTHER**

**PIONNEER
SPIRIT**

**STAND
TOGETHER**

**PERFORMANCE-
MINDED**

Our Strengths

Our integrated business model

We are present across the entire value chain, **from production to distribution.**

Our employees

105,000 people representing **160 nationalities** and **730 métiers**. A diversity which is decisive for our competitiveness and attractiveness.

Our global footprint

We are active in more than **130 countries** and nearly **800 production sites** worldwide.

Our Key Figures

\$4.1 bn

in adjusted net income in 2020, demonstrating our resilience

More than
4,000
researchers
in our 18 R&D centers

More than
8 millions
customers served in our
15,500+
service stations every day

30 %
polymers
produced from
recycled materials
by 2030

World no.2
in liquified natural gas
(LNG)

2.9 Mboe/day
produced in 2020,
of wich 55% natural gas

150,000
charge points
for electric vehicles
by 2025

8.5 million
gas and power customers
in Europe

±\$1 bn
invested in R&D
in 2020, of wich
40% on carbon
reduction

>100 GW
production capacity for
renewable electricity by 2030

\$2 bn
invested in renewables
in 2020

TotalEnergies is a broad energy company that produces and markets energies on a global scale: oil and biofuels, natural gas and green gases, renewables and electricity. Our 105,000 employees are committed to energy that is ever more affordable, clean, reliable and accessible to as many people as possible. Active in more than 130 countries, TotalEnergies puts sustainable development in all its dimensions at the heart of its projects and operations to contribute to the well-being of people.
