

TotalEnergies

**Managed Fully Flexible
for Biogas Generation**

Giving you total control

**The flexible biogas purchase
agreement for the energy expert**

How it works

Have the greatest flexibility and control to forward fix your biogas price up to and including the day of delivery of the generation.

Any volume you haven't forward fixed will be priced on an SMP basis.

Benefits

Highest market risk means the greatest potential to achieve the best price for your generation.

Allows you to capitalise on your knowledge of the energy market and your generation profile.

“ ”

I want to secure the best prices for my generation and don't mind taking on some risk to do this.

Key Features at a glance

Having a good grasp of your expected generation, you can freely hedge to get the best prices for your export.

Carry out transactions in the curve or prompt traded periods.

Any volume you have not forward fixed will be priced at an SMP basis.

Manage your generation position through our online transactional platform.

Transportation Charge/Benefit Benefits

As designated by the Local Distribution Zone (LDZ) 100% of any cost or benefit will be passed to the generator.

Commodity Costs

You can make forward transactions freely up to and including the day of delivery. Any difference in volume between your fixed position level and actual generation is settled on the within day market (System Price) or on an agreed index price.

Excess / Shortfall Price
(SMP)
