Objet / Subject : Deployment of company rule CR-GR-HSE-701	

Dear all,

The company rule CR-GR-HSE-701 *Emergency and Crisis Management* was published on REFLEX on the 30/09/2019 and will be effective on the 30/12/2019. This company rule replaces CR-MS-HSEQ-801.

A summary listing the main requirements is available on the first page of the company rule. To help you deploy this rule on the field, we offer in addition:

- A synthetic gap analysis (additions, modifications and deletions) between the old and the new rule, specific for M&S;
- A support file intended to list the requirements of this rule and enabling their compliance follow-up.

The company rule CR-GR-HSE-701 defines the minimum requirements to maintain an appropriate state of readiness to respond to an emergency or crisis situation and mitigate its consequences. It reinforces existing requirements and formalizes current good practice. It covers in particular the following aspects:

- Emergency and crisis response preparedness (risk assessments, Emergency Response Plans, training and exercises),
- Emergency & crisis Management process (alerts, mobilization of teams and resources, response action planning, debriefing & demobilization requirements),
- Continual improvement, including Emergency Response Plan reviews and REX.

The company rule CR-GR-HSE-701 requires the use of the F.I.S.A Methodology (Facts, Impacts, Stakeholders, Actions) which is a process to identify and prioritize response actions based on actual and potential impacts to People, Environment, Assets, Reputation and Liabilities (PEARL).

☞ **I remind you that each affiliate must:**

- **Identify the gaps between its referential and the new requirements,**
- **Implement the associated action plans to correct the differences,**
- **Comply with the rule on the target date.**

Hans-Christian Gützkow
