	LOADING SOLVAREX 9A (A170) HIGH CUMENE	From 01.12.2023 tank trucks and tank containers will be loaded exclusively with dry couplings. DHC will provide the technical equipment for this. In order to ensure a safe loading, the following two requirements must be met: 1) The gas replacement line is ground operated. 2) The tank container is placed flush with the rear of the chassis. No further conversions or devices are necessary on the trailers.
