

Styrelf[®] RC

The high-performance binder
specially formulated for
customized recycling

TotalEnergies

Styrelf® RC,

To incorporate more asphalt aggregates while preserving their durability.

OUR OFFERING

Recommendation of the Styrelf® RC grade that best meets your specifications

A binder specially formulated for your recycling operations

HOW DOES IT WORK?

Submit your specifications

- Recycling rate
- Characteristics of the aged binder
- Target characteristics for the fresh binder

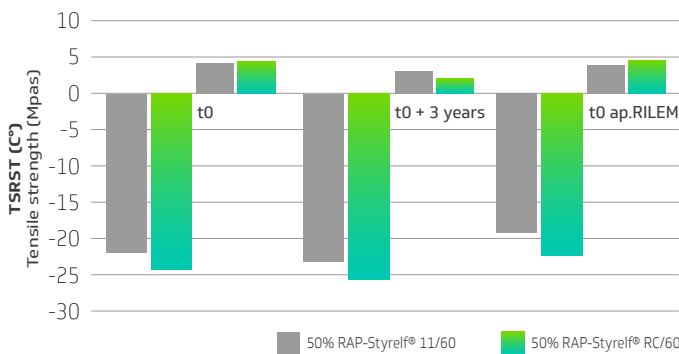

Recommendation from bitumen experts

The Styrelf® RC grade best suited to your recycling operation

Begin your formulation study with the recommended binder

BETTER PERFORMANCE, BETTER DURABILITY!

Assessment of performance of the binders Styrelf® RC and Styrelf® 11/60. Asphalt aggregates are recycled (at 50%) in both formulas.

This comparison demonstrates less aging of the road with use of the Styrelf® RC binder compared to the Styrelf® 11/60.

Values measured at low temperature via the uniaxial TSRST test (performed on the A72 freeway in partnership with ASF and EUROVIA).
