

FIXED ELECTRICITY OPTIONS

Choose accuracy for your non commodity charges.

How it works

- Choose a contract term from 1 to 5 years in length
- Fix the price for the majority of your charges across the whole term
- You can choose which set of non commodity charges will be reset on an annual basis

Benefits

- Maintain security and certainty for most of your charges
- The charges we reset each year will reflect our latest view at that time, giving you peace of mind that you're paying what you should for them

“ Paying only what is necessary is crucial to my business. I want to know that my charges are being reviewed for accuracy each year. ”

Key Features at a glance

- On a normal Fixed plan you would fix all your energy cost elements at the time of accepting a contract
- On this plan, you'll fix some of your cost elements and others will be reset on an annual basis according to latest forecasts
- This means you're getting more accurate charges for those cost elements that are being reset
- You can choose from 3 different group options for which non commodity charges you'd like to reset annually (see table on the right)

Group Options	Description
1. Environment Charge	Charges related to supporting government environment programs
2. Network Charge	Network-related transmission and distribution charges (except for DUoS Standing Charge)*
3. Non Commodity Charge	Environment Charge and Network Charge combined

*DUoS Standing Charge is related to charges levied by network operators

How does this work in practice?

Contract Year	Annual Volume	Non Commodity Group Plan Annual Charge*	Standard Fixed Plan Annual Charge*
1	1000kWh	£100	£120
2	1000kWh	£120	£120
3	1000kWh	£110	£120
Total		£330	£360

*Please note charges that are reset annually can go up or down

Why Total Gas & Power?

In addition to being one of the UK's largest energy suppliers, we're committed to helping our customers reach their carbon net zero goals. We offer a range of valuable services, including:

Renewable Energy Plans

Reduce your carbon emissions by ensuring your energy comes from 100% renewable UK sources.

EV Charging

Future-proof your EV charging requirements with our world-leading networked technology.
